AWS solutions make remote work and learning both secure and easy to implement

With the help of Stratus10, your government agencies, educational institutions, and nonprofit organizations can easily move to the AWS Cloud for remote work

Maintaining business and organizational productivity can be difficult when operations are forced to move to a remote environment. With Amazon Web Services (AWS) applications like WorkSpaces, Amazon AppStream 2.0, and Amazon Connect, organizations can give virtual desktops to employees, stream virtually to students, and set up contact centers with remote locations. Stratus10 and AWS work together to bring you the best strategy for remote working.

Benefits of AWS remote working

Scalability

The AWS Cloud allows organizations to scale their resources without the need of any hardware inventory.

Security

Solutions like Amazon WorkSpaces help to keep data secure by providing storage to users in the AWS Cloud and avoiding the storage of your organization's data on local devices.

Pay as you go

Depending on the demand of your remote working needs, these AWS tools are all based on a usage model and help to reduce costs as you scale.

About Stratus10

Stratus10 is a certified Cloud Solutions Provider and Service Integrator with a passion for technology and decades of experience in Software Engineering, IT, and Amazon Web Services (AWS). We specialize in helping clients successfully migrate and manage their infrastructure on AWS by designing and building highly scalable and cost-effective cloud solutions for their businesses.

Six AWS solutions that will transform remote work for your organization

With AWS remote solutions, you can tackle business challenges like communication and collaboration, customer service, and access to applications for all the right audiences. Amazon WorkSpaces and Client VPN give remote desktop access with secure network and cloud storage to scale up, while AppStream 2.0 allows for users to stream content from anywhere. Tools like Amazon WorkDocs and Amazon Chime help to foster easy collaboration and communication with a pay-for-what-you-use model. When it comes to customer service, Amazon Connect has been the best tool to set up contact centers virtually. All these solutions together, along with the expertise and guidance of Stratus10, make remote working, simple, secure, and scalable.

Remote Work Solutions

AWS Partner Promotion

Stratus10 is an Amazon Web Services (AWS) Advanced Consulting partner helping companies migrate their infrastructure and applications to the cloud and helping them implement best practices. Stratus10's migration services go beyond migrating servers or VMs to AWS and includes a comprehensive migration plan that will provide you with a clear picture of the cost of ownership, migration process, and a post-migration modernization and automation strategy. With hundreds of migrations under their belt, Stratus10 has developed streamlined processes and automation to provide a robust and secure migration experience for their clients.

In addition, Stratus10's staff and engineers go through ongoing weekly training in order to keep up with and learn about the latest features and technologies AWS has to offer.
